Office Action Summary	Application No. 10/661,410	Applicant(s) PAUL ET AL.	
	Examiner Thomas J. Sweet	Art Unit 3738	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of Species H claims 23-31 in the reply filed on 7/15/05 is acknowledged. Claim 23 appear to be a generic embodiment to each of the species shown in the figures.

Drawings

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the "deformation of the optic" must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 23-31 are rejected under 35 U.S.C. 102(a) as being anticipated by Laguette (US PGpub 20020188351). Laguette discloses an intraocular lens (title) for insertion into an eye, comprising: a unitary (one or more materials molded into a single piece), deformable ([0015]) multifocal optic ([0017]) including a first zone having a baseline power for distance vision correction (along the periphery) and a second zone having an add power (central portion); and a force transfer assembly ([0019]) coupled to the optic and structured to cooperate with the eye to effect deformation of the optic so as to change the power of at least one of the first and second zones ([0020]).

With respect to claims 27 and 31, the force transfer assembly is further structured to axially move the optic in response to an action of the eye ([0020]), wherein the axial movement of the optic combines with the increased add power obtained through the deformation to provide enhanced accommodation relative to the deformation alone.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Glazier (US 6855164), Glick et al. (US PGPUB 20040054408) and Lang et al. (US 6231603).
